EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims:

In claim 2, insert - - . - - after "electronically" .

In claim 6, insert - - . - - after "electronically" .

The following is an examiner's statement of reasons for allowance:

The prior art of record neither shows nor suggests a lighting apparatus comprising all of the elements of claim 1 in combination including a base, a yoke, a lamp housing comprising a light valve and a camera, and in particular:

"wherein the base, and the yoke are coupled so that the yoke can rotate with respect to the base;

wherein the lamp housing and the yoke are coupled so that the lamp housing can rotate with respect to the yoke;

wherein the camera captures at least a portion of the projected image on the projection surface as a captured image;

wherein the captured image is rotated to a desired orientation by a command received at the communications pod; and

wherein the rotated captured image is projected onto the projection surface to create video feedback art comprised of a series of projected images.”.

Claim 5 is allowed for the same reasons given with respect to claim 1 and the following limitations further distinguish the claim over the prior art of record:

“wherein the first projected image has an orientation and the second projected image has an orientation, and the orientations of the first and the second projected images are different; and

wherein the first captured image is rotated by a command sent from a central controller over a communications system to a first image projection lighting device by an operator of the central controller in response to an artistic requirement to create video feedback art comprised of a series of projected images.”.

Claim 9 is allowed for the same reasons given with respect to claim 1 and the following limitations further distinguish the claim over the prior art of record:

“wherein the captured image is formed by the light valve to produce a second projected image;

wherein the first projected image and the second projected image are projected on to the projection surface at different rotational angles of orientation;” and

“and wherein the command is determined by an operator of the central controller.”.

Claim 8 is allowed for essentially the same reasons applied to claims 1, 5 and 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melissa J Koval whose telephone number is (571) 272-2121. The examiner can normally be reached on Monday through Friday.
